

General Integration

Medfusion Payment Gateway API

[Medfusion Payment Process API](#) provides services to handle basic payment transaction.

Support Payment Processor Type:

1. WorldPay - Medfusion Payment is an authorized Pay Fac for WorldPay.
2. PayPal
3. QBPay (Legacy Practices Only)

Get Started with <https://medfusion.atlassian.net/wiki/spaces/RCMISO/pages/881721451/mfgateway-api>

1. Healthcare Online Bill Payment to perform one time authorization
2. Payment - Recurring agreement such as Budget Bill Pay
3. Payment - using Credit Card on File to authorized schedule recurring payment or online Bill Pay
4. Payment - Online Bill pay with Pay Now which allows user to make a payment with guest login

Medfusion Gateway Reporting Tool

Provides Integration Partner a turnkey solution to view transaction activities and settlements information. When practice enrolls with Medfusion Payment Process, they becomes the sub-merchant to WorldPay. Medfusion Pay offers a variety of reporting as a convenience tool for practice to track their patient payment collection activities.

[Medfusion Gateway Reporting Tool](#)

Medfusion Point of Sales Terminal Solution

Provides on perm solution for Point of Sales terminal to be installed on practice site that integrates directly with Medfusion Payment.

Medfusion Merchant Provisioning

Provide practice on boarding process all in one place. Medfusion office handles the provisioning process including creating subm-merchant account, underwriting payment rate and POS terminal registration.
